

Fire Systems Service Overview

Complete fire protection solutions designed, installed, and maintained to keep people safe and buildings compliant.

We cover fire alarms, extinguishers, AOV smoke ventilation, fire safety signage and ongoing maintenance — all delivered to the highest British Standards. Our services support a wide range of residential, commercial and public buildings, with tailored solutions for every environment.

Built to British Standards

All work is carried out to the latest legislation and BS EN standards.

Protecting People & Property

Reliable systems, maintained to perform when it matters most.

Ongoing Support

Planned maintenance and responsive support you can rely on.

What's Included

Fire Alarm Systems

Design, installation and maintenance of conventional and addressable fire alarm systems.

Fire Extinguishers

Supply, commissioning and servicing of portable extinguishers and fire blanket solutions.

AOV Smoke Ventilation

Installation and maintenance of Automated Opening Vent systems for smoke control and occupant safety.

Fire Safety Signage

Provision and installation of compliant fire exit, safety and informational signage.

Planned Maintenance & Testing

Routine inspections, functional testing and certification to ensure ongoing compliance and reliability.

Why Helix

- ✓ One accountable team from start to finish
- ✓ Responsive support when you need it
- ✓ Clear documentation and reporting
- ✓ Practical, compliant solutions that work

How We Work

1. Survey

We assess your building and fire risk to understand your exact requirements.

2. Design

Tailored system design that meets standards, your needs and budget.

3. Installation

Professional installation by qualified engineers, on time and on budget.

4. Maintenance

Planned servicing and testing to keep systems reliable and compliant.

5. Certification

Full certification and documentation for your records and assurance.
