

Security Systems Service Overview

Integrated security solutions designed around how your building actually operates.

We design, install and maintain smart security systems across every part of your site. From CCTV surveillance and intruder detection to access control, intercom systems and gate automation — everything works together to protect people, assets and property while supporting the smooth operation of your building.

Built to British Standards

All systems are designed, installed and maintained to the latest legislation and BS EN standards.

Protecting People & Property

Integrated solutions that reduce risk, deter threats and support everyday operations.

Ongoing Support You Can Rely On

Fast response times, proactive maintenance and expert support when you need it most.

What's Included

CCTV Surveillance

High-definition cameras and analytics for monitoring, recording and remote viewing.

Intruder Alarms

Reliable detection, alerting and monitoring to deter and respond to intrusions.

Access Control

Secure entry solutions, from keycards and codes to biometric and mobile credentials.

Intercom Systems

Audio and video intercoms for communication and controlled access.

Gate Automation

Automated gates and barriers for secure, convenient vehicle access management.

Ongoing Service & Support

Planned maintenance, remote monitoring and responsive technical support.

Suitable Environments

Commercial Buildings

Residential Developments

Managed Properties

Education & Healthcare Sites

Why Helix

- ✓ Tailored design to suit your site and operations
- ✓ Responsive support when you need it most
- ✓ Clear documentation and system handover
- ✓ Scalable systems that grow with your business

How We Work

1. Survey

We assess your building and security requirements to understand the risks and objectives.

2. Design

We create a tailored solution that meets standards, suits your operations and your budget.

3. Installation

Professional installation by qualified engineers, minimising disruption on site.

4. Commissioning

We test, configure and commission all systems to ensure reliable performance and compliance.

5. Ongoing Support

Proactive maintenance and fast response support to keep your systems working and your site secure.
