

Smart Systems Service Overview

Connected systems and supporting infrastructure for smarter, more responsive environments.

From smart home automation and Wi-Fi coverage to network and IP infrastructure, we design, install and support connected systems that work seamlessly together. We also provide minor electrical works to ensure your technology is safe, compliant and ready for the future.

Integrated Technology

Systems that work together seamlessly for better control and reliability.

Future Ready Infrastructure

Scalable, secure and designed to adapt as your needs evolve.

Dependable Support

Ongoing service and expert support to keep your systems performing at their best.

What's Included

Smart Home Automation

Control lighting, climate, security and more through intuitive automation and smart devices.

Wi Fi & Network Infrastructure

High-performance Wi Fi, structured cabling and reliable network design and installation.

IP Systems Integration

IP cameras, access control, intercom and other systems integrated for unified control.

Minor Electrical Works

Additional outlets, power supplies and safe, compliant electrical works to support your systems.

Connected Device Setup

Configuration and pairing of devices for seamless operation across your environment.

Ongoing Support

Remote and on-site support to keep your systems secure, updated and performing.

Suitable Environments

High End
Homes

Commercial
Spaces

Managed
Properties

Multi Use
Buildings

Why Helix

- ✓ Integrated design that brings systems together
- ✓ Practical technology that improves everyday living
- ✓ Scalable infrastructure built for the future
- ✓ Dependable support from experienced specialists

How We Work

1. Survey

We assess your property and understand your goals and environment.

2. Design

We design a tailored system that meets your needs and budget.

3. Install

Professional installation by qualified engineers with minimal disruption.

4. Configure

We configure and test all systems for seamless integration and control.

5. Support

Ongoing support and maintenance to keep your systems performing.

Quality You Can Trust

High quality equipment and workmanship built to last.

Secure by Design

Cyber secure systems and best practice installation standards.

One Team, One Solution

End to end service from design to ongoing support.

Request a Survey

Get expert advice and a tailored recommendation for your property.
